Galileo Plus Ticket Eater

The Galileo Plus is a single Ticket Eater like the Pro edition but its presented in an eye catching design with LED "multi-colour" lights, walls that are transparent plexi-glass and frame made of aluminium specially designed.

It also comes with an LCD screen and extra new sounds to entertain players as they feed their tickets.

Players feed their redemption tickets into the machine whilst the machine plays counting and attract mode eating noises/sounds, burps and speaks to entertain players, encouraging them to insert more.

The machine counts the points up on a large easy to read DOT MATRIX display from the ticket data and issues the player with a ticket receipt with the total of the points, which can then either be redeemed for prizes at the kiosk.

The Galileo Plus Ticket Eater is designed to be used either as a standalone machine or in conjunction with the Galileo Redemption POS terminal so players can save their points directly onto VIP cards.

Galileo Plus Ticket Eater can be programmed to work with 3 types of tickets: Standard 2-inches, 1.25 inches and 1 inch.
