Big Wheel

With bright lights, carnival sounds and an irresistible challenge, Electrocoin's Big Wheel is more than just a prize machine - it's a show-stopper that brings excitement and colour to any location.

Players love the intuitive "tip the basket" gameplay, its simple to learn yet full of skill-based fun, it keeps players coming back.

With every successful tip, players win a prize right away and there's no waiting, no guessing - just pure reward. Even if the basket isn't emptied, players can still earn (optional) mercy tickets, making every attempt rewarding.

Players insert a coin and the action begins – music ramps up, the countdown starts and the Big Wheel spins into motion.

As the wheel rotates, players must carefully time their press of the start button to raise the hammer precisely when it aligns with the arm of the rotating basket, tipping it to release and win the prize.

The dazzling cabinet and classic ferris wheel theme, complete with vibrant LEDs, whimsical artwork and iconic carnival music create a funfair vibe that draws attention across the room.

Big Wheel is a proven success with engaging, challenging gameplay and minimal maintenance. Its flexible prize options - from capsules and ball vend to mercy tickets - make it easy to tailor to any audience. And with its durable build, it's ideal for high-traffic locations.

It's a game the whole family can enjoy together. Great for group play and boosting dwell time, it's a must have for any location.
