## Mr Do Space Rocks

Mr Do Space Rocks provides players with an innovative spin on the classic coin pusher, replacing coins with a number of kinetic balls, in a closed loop environment, as they zoom around the game.

The two player Mr Do Space Rocks pusher is a funky and vibrant experience to brighten up any entertainment centre.

The two-player game is presented with bright colours, eye catching, attractive cabinet with a commanding floor presence.

With thrilling ticket redemption functionality, the game sees players send a number of balls around the sci-fi themed cabinet as they aim for bridges, a moving platform, and targets such as the prize wheel, fighting to win high scores and tickets.

Accompanying the high-action gameplay is a barrage of visual and sound effect, immersing players in the action-packed outer space world of Mr Do Space Rocks.

Players and operators alike have ample opportunity to get the most out of their experience with the machine, affording players multiple opportunities to win big, for example through mega bonus scores while operators have the flexibility to increase ticket and ball pay outs.
