## Rocket Launch

Electrocoin's Rocket Launch is a stellar choice for arcade owners and locations, with the eye-catching cabinet a must for all coin-op operators.

Featuring an "attractive and vibrant three-sided glass cabinet," the simple-to-play title requires players to time the launch of a rocket to the millisecond, in order to try and claim prizes from a rotating turntable.

Players must insert a coin, which will begin the rotation of the turntable. On the turntable there are 56 individual clips where prizes can be hung from.

Prizes are 'clipped' in on each clip and players have to skilfully and accurately press the button that will launch the rocket.

The rocket will launch downwards, and if the rocket is perfectly aligned with the clip as it reaches the clip, it will unclip the hanging prize which will drop into the collection basket.

Rocket allows operators to configure up to nine different prize banks.

With the striking multi-colour LED Lighting, shelf area to display prizes, it provides a visual spectacle for any location. With so many options to display different prizes, it can appeal to the whole family.

Rocket Launch is also available with optional Ticket Redemption facility.

## Dimensions

Height: 210cm  
Width: 76cm  
Depth: 85cm

Weight: 110Kgs

## Additional information
