## Twin Star Crane

The Twin Star Crane is proving a little treasure, as the small-scale cabinet proves the perfect option for FEC operators short on space but keen for quality.

The two-player mini crane is presented with a bright colour scheme and small (but perfectly formed) features.

With a durable metal cabinet, and "exciting" sounds, accommodating prizes up to 8cm, operators can maximise their amusement floor income.

But also, as it has such a small footprint, it provides another offering for players whilst not occupying much space

Twin Star is available in two colour schemes - Yellow and Blue - providing choice and variety, and features a simple set up menu that allows for multiple modes of play.

Though the Twin Star is one cabinet, the two cranes can be set differently, its available with the standard crane mode in addition to prize every time.

The cabinet itself provides an upper display area to place different prizes for players to collect, as well as a storage area at the bottom, very handy when storage space is minimal or none.

"The Twin Star, albeit small, is a big 'Star' in amusement areas and a must for any games area and prize-vend operators."

### Dimensions

Height: 202cm  
Width: 60cm  
Depth: 46cm

Weight: 85Kg
