Nexus Strip Photo Booth

Brighten up your events with the Nexus Strip Photo booth. Almost six feet tall when open, this is the next stylish photo booth with social media integration.

Part of the Digital Centre new LED revolution, the Nexus combines the photo booth technology with an interactive LED Screen giving it the WOW factor like the New Generation Panther Revolution photo booth.

The Nexus Strip is ultra light and ultra portable for a photo booth and specifically designed to suit most spaces and have easy mobility.

Just fold the screen and take it with you.

This is ideal for event planners and events including weddings, birthdays, celebrations, pop-ups and more...
