Galileo Ticket Eater

Simply the best Ticket Eater available for any Redemption FEC.

Players feed their redemption tickets into the machine whilst the machine plays counting and attracts mode eating noises/sounds, burps and speaks to entertain players encouraging them to play more.

The machine counts the points up on a large easy to read DOT MATRIX display from the ticket data and issues the player with a card with the total of the points, which can then either be redeemed for prizes at the kiosk.

The Dot matrix can also be used for displaying customised messages and offers.

The Galileo Ticket Eater is designed to be used either as a standalone machine or in conjunction with the Galileo Redemption POS terminal so players can save their points directly onto VIP cards.

Dimensions

H: 183cm
